Model H8840 “Motorsports” Headset

From the company that specializes in communication solutions for high-noise environments.

Introducing David Clark Company's new Model H8840 noise-attenuating, communication headset for team motorsports.

Since the very beginning, David Clark has been manufacturing the finest communication headsets found at the track... any track. We pioneered and refined the concept of clear communication combined with hearing protection on the flight decks of aircraft carriers and in the cockpits of military and civilian aircraft. That expertise was called upon when pit crews and racing enthusiasts recognized the need for clear communication as well as hearing protection at the track. We've been there ever since.

The H8840 has been designed for, and is in use at, the very highest levels of motorsport racing. This tough, rugged and effective headset is now available to you for the first time directly from the manufacturer.

Product Features:

- **Certified Noise Reduction Rating of 24dB**
- **Newest Undercut, Comfort-Gel Ear Seals**
- **Dome Mounted Push-to-Talk Button**
- **Lightweight, 17 oz.**
- **Industry-proven, 150 ohm M-101 Noise-Cancelling Microphone**
- **Rugged and Reliable 8-ohm Earphones**
