

Discrete Situations... Intelligent Solutions

Surveillance Kits

OTTO sets the standard in durability, reliability and performance for **Surveillance Kits**. Experience high-clarity, two-way radio transmissions that are unnoticed by others around you. Not just for "surveillance" purposes anymore, these kits are perfect for security at airports, casinos, manufacturing plants, crowd control at conventions and concerts, and others working in environments requiring **discrete** communications.

- **Earphone, Two-Wire and Three-Wire Kits** are designed with a low-profile, flexible, transparent acoustic tube along with a quick disconnect adapter
- **Two-Wire Earbud** is designed with an earbud style earphone with miniature PTT and microphone
- **Wireless Ear Receiver** fits securely in your ear canal and is used in conjunction with either the Flat Pack or Neck Loop to create an inductive field that transmits the radio's sound.

Accessories for Surveillance Kits

Modular Earphone Accessories provide even more flexibility to users in multiple shifts sharing equipment or to those who need options when moving from a high noise to low noise environment.

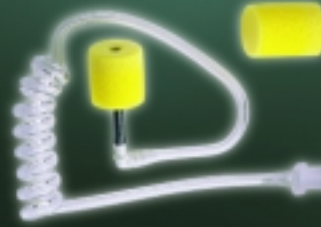

- **Flexible Open Ear Inserts** have an open frame design that allows the user to hear ambient noise
- **Noise-Attenuating Kits** provide additional hearing protection (NRR of 25 dB)
- **Quick Disconnect Adapters** allow users to easily replace or alternate acoustic tubes
