

PORTABLE COMMUNICATION SYSTEM FOR LIGHT ARMORED VEHICLES (HUMVEES)

Features:

- *Simplified installation and removal.
Capable of use in noise levels to 125 dB*
- *Water-resistant components are designed
to withstand harsh elements*
- *Completely sealed from effects of wind,
sand and moisture*
- *Simplified operation with ergonomic body
switch and toggle switch controls*
- *Radio select switch for dual radio interface*
- *Rotary volume knobs for intercom and
radio volume levels*
- *Interfaces with the Motorola Jedi Series,
SINCGARS, and most other avail-
able radios*
- *Powerful magnets allow the system to be
modular and easily moved from one vehicle to
another*
- *Throat mic provides superior voice repro-
duction in areas where wind noise is a
problem*

Setting the Standard for Cost-Effective Intercom Design.

Gunfire, shouting and the Humvee's roar... sensory overload.

Effective intercommunication between crewmembers in tactical vehicles is crucial, as lives are being risked.

The team at David Clark Company understands this need and has tailored a system ***specifically for the Humvee application and other light armored vehicles.*** Our solution will provide crisp and clear intercommunication for up to three crewmembers per vehicle.

Compatible with most commercial and military radios, our Commercial Off-The-Shelf (COTS) technology is simple to operate and maintain while offering the cost effectiveness that the COTS program delivers.

Reliable, rugged, and portable.

The **Portable Communication System** is designed to be moved from vehicle to vehicle with minimal effort, when it counts.

For more information on this or other vehicle intercom systems, including custom requirements, call **1-800-298-6235.**

PORTABLE COMMUNICATION SYSTEM FOR LIGHT ARMORED VEHICLES

SYSTEM COMPONENTS

Weather-Resistant Portable Communication System Can Be Quickly Moved From Vehicle to Vehicle

Intercom and radio functions for up to three crewmembers

Rugged cast aluminum enclosure provides RFI/EMI immunity.

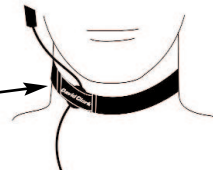

Durable Mil-Spec (MS) weather-tight modular connectors

Powerful magnets on back of unit improve portability and mounting options.

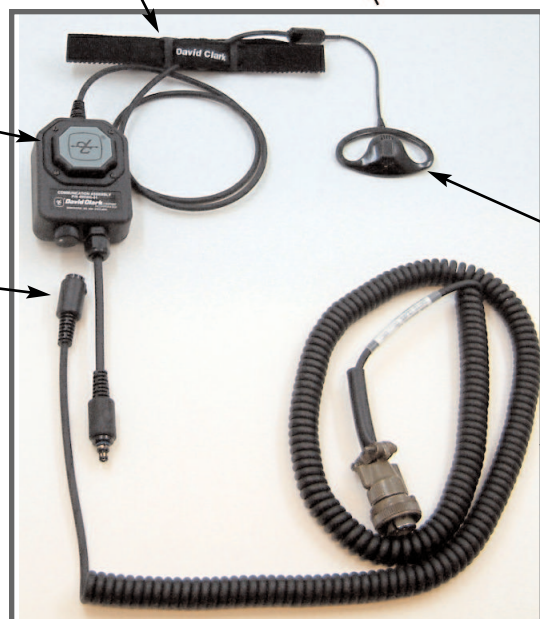

Weather-Resistant Communication Assembly for Crewmembers

Throat mic enclosure maintains a protective environment from wind, sand and water (other mic styles available.)

Body switch PTT has large, easy-to-locate push button and volume switch.

Military-grade self-cleaning breakaway connector

Earphone fits comfortably under combat helmets and is water and dust-resistant.

Heavy-duty coil cord with Durable Mil Spec (MS) connector
